

Highfield awarding body for compliance

The awarding body that **Listens**

Highfield awarding body for compliance (HABC)

HABC is the fastest growing Awarding Body in the UK and is the ideal choice for corporate organisations, SMEs, sole traders and the Public Sector. We are proud of our reputation within the industry to offer competitively priced, extremely relevant compliance qualifications that are highly regarded by Environmental Health Practitioners, Auditors and Enforcement Officers.

- All HABC qualifications sit on the new regulatory framework (QCF), have the full support from the relevant *Sector Skills Councils* and are recognised by Ofqual, DCELLS and CCEA.
- HABC have deliberately concentrated on a select offering of compliance qualifications, in which our team has in excess of **100 years' experience**. Specialising in this way enables us to divert all our resources to the areas that matter, delivering a superior, more focussed service in the process.
- Examination questions are relevant to good working practices as opposed to theory. Exam papers are **updated regularly** and HABC will always listen to feedback on how questions can be improved.
- The delivery of results and certificates is a major concern for organisations who require a quick turnaround to meet business requirements. **HABC guarantee** that certificates will be delivered to the Registered Centre within 7 working days of receiving examination papers.
- When you choose HABC as your awarding body, you are selecting an organisation with the highest standards of customer service that believes your interests are the very heart of our business.
